1.

Which of the following two statements is a more accurate statement about gradient descent for logistic regression?

- ☐ The update steps are identical to the update steps for linear regression.
- ☒ The update steps look like the update steps for linear regression, but the definition of $f_{w,b}(\mathbf{x}^{(i)})$ is different.

✔ Correct

For logistic regression, $f_{w,b}(\mathbf{x}^{(i)})$ is the sigmoid function instead of a straight line.
